

## Environmental resolution mechanisms beyond the nation state. A comparative analysis of the implementation of court judgements and managerial agreements (国を超えた環境問題解決メカニズムの比較分析)

新川匠郎研究室ではコルカーチ、アンドレアス氏が行われている「国際的な環境問題解決メカニズムの比較研究」プロジェクトに関するオープンセミナー(英語)を開催します。

Niikawa Sho Lab organizes an open seminar of Dr. Corcaci. He compares the implementation of decisions on environmental conflicts across judgements from European and international courts and managerial decisions from implementation committees. The puzzle that implementation occurs despite different 'resolution mechanisms' is investigated by making use of existing research on EU policy implementation to assess preferences, legitimacy, and sanctioning mechanisms as explanatory conditions. *Under which conditions does effective implementation of European and international environmental court judgments and managerial decisions occur?* To answer this question, he outlines a concept structural framework based on the management and enforcement approaches, following a conjunctural logic. He applies this framework by comparing implementation processes resulting from various court and committee decisions relating to hazardous waste and chemicals, water resource management, and protection of the marine environment. The seminar will be held in English.

**日時**2024年 6月7日 (金)  
10:40~12:10**場所**神戸大学国際文化科学研究科 **E411教室**および **オンライン** (Zoom, ハイブリッド形式)**オンライン参加事前予約アリ**

Max Planck Institute for Comparative Public Law and International Law, Heidelberg

Graduate School of Intercultural Studies, Kobe University

**Andreas CORCACI** is a Marie Skłodowska-Curie Postdoctoral Fellow at the University of Antwerp engaged in research on environmental conflict resolution, in particular the national implementation of court judgements and managerial agreements. Before, he was a Postdoctoral Fellow at Goethe University Frankfurt am Main. His research interests lie in the areas of multilevel (judicial) governance and administration in environmental, energy and climate policy, as well as concept structures and set-theoretic multimethod research. He has a Dr. phil. from Technische Universität Darmstadt with a dissertation on compliance in the European Union using Qualitative Comparative Analysis.
